

Exercise 1: Obtain system information using the command line

1.) Go to Command Prompt

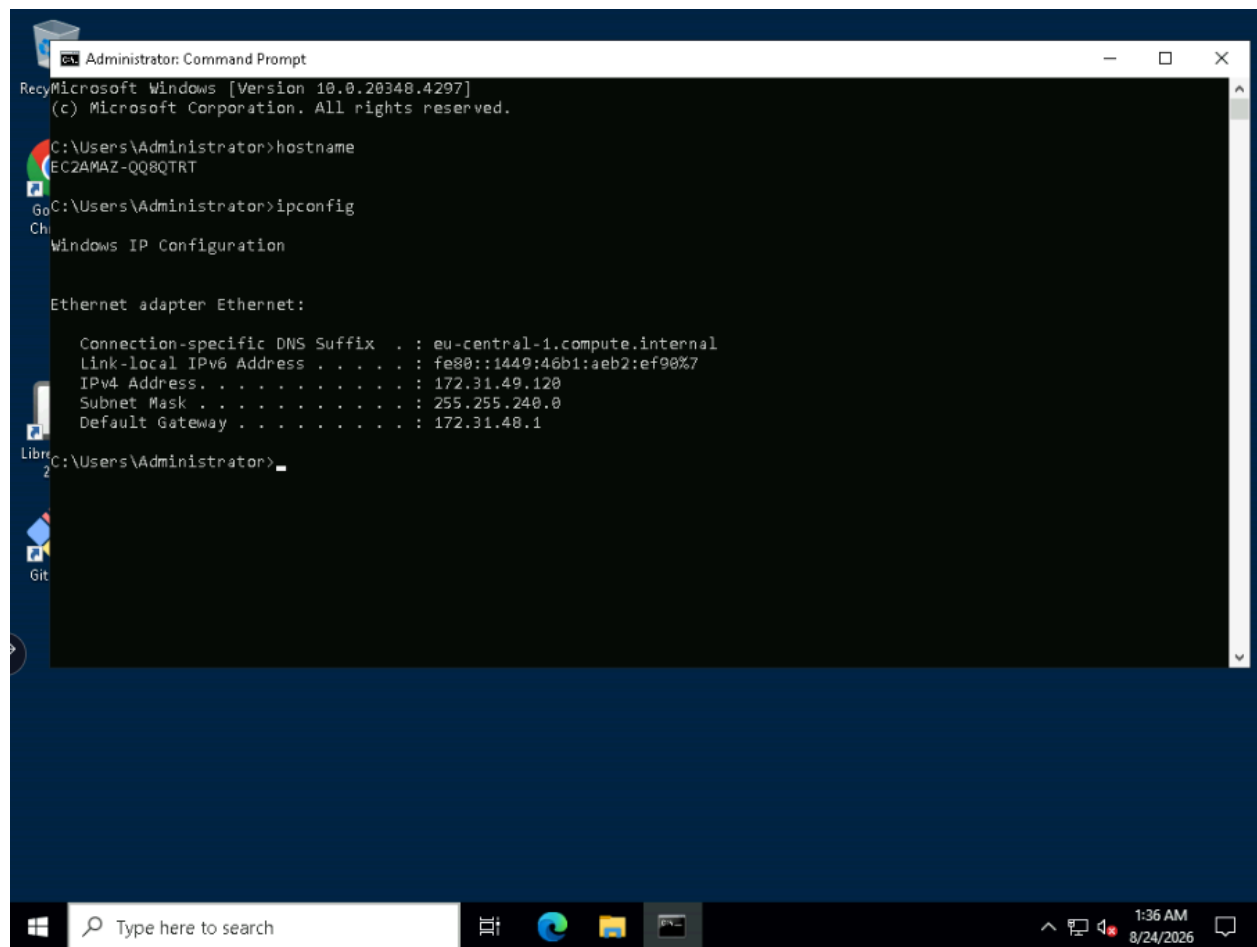

2.) Type "hostname"

3.) Type “ipconfig”

- a.) Here you will see several network identifications for the local system including IP address, subnet mask, and default gateway.

```
Administrator: Command Prompt

5.) Type “cls” to clear the command line window

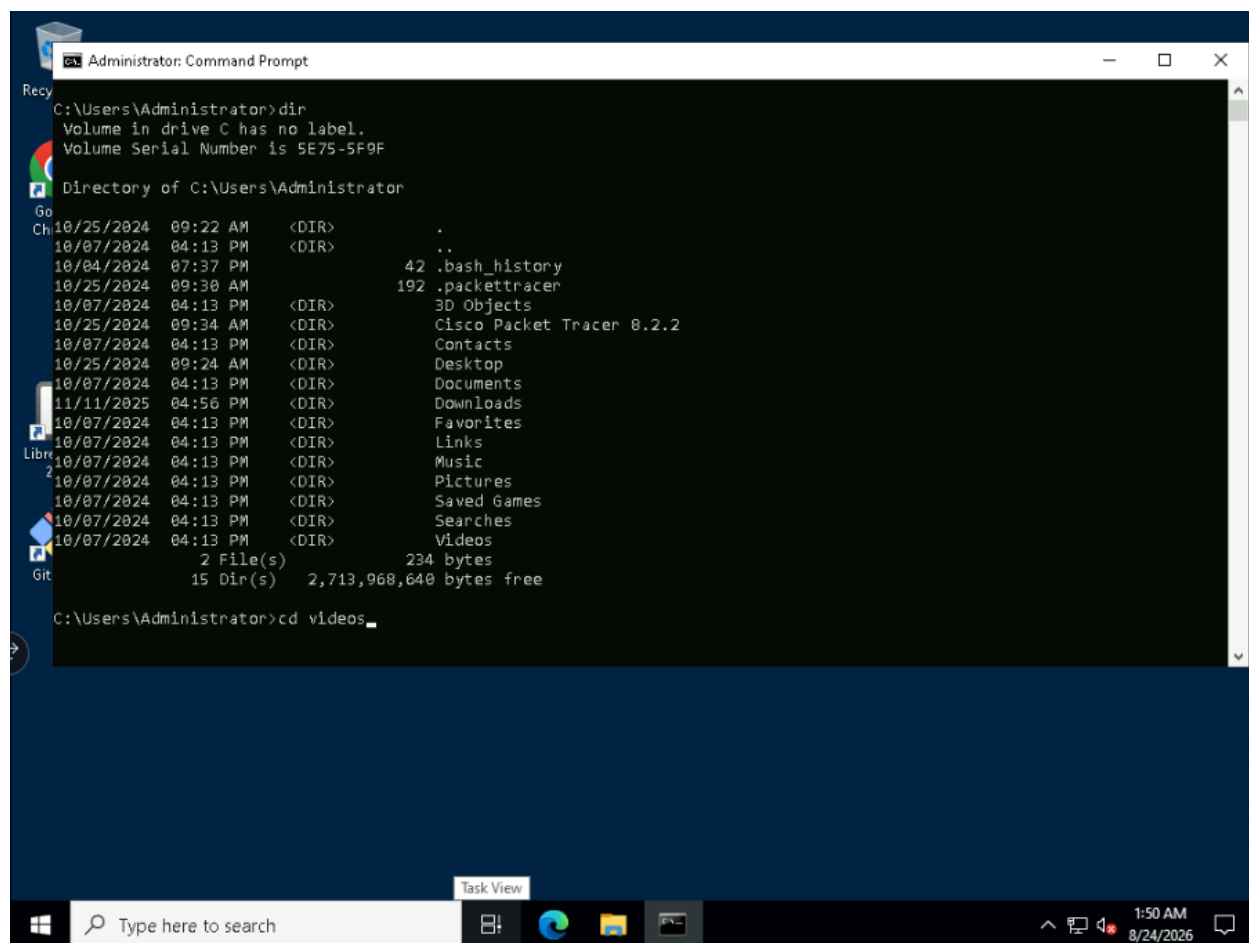

Exercise 2: Manage directories using the command line. In this exercise we will view directories, create directories, and remove directories using the command line.

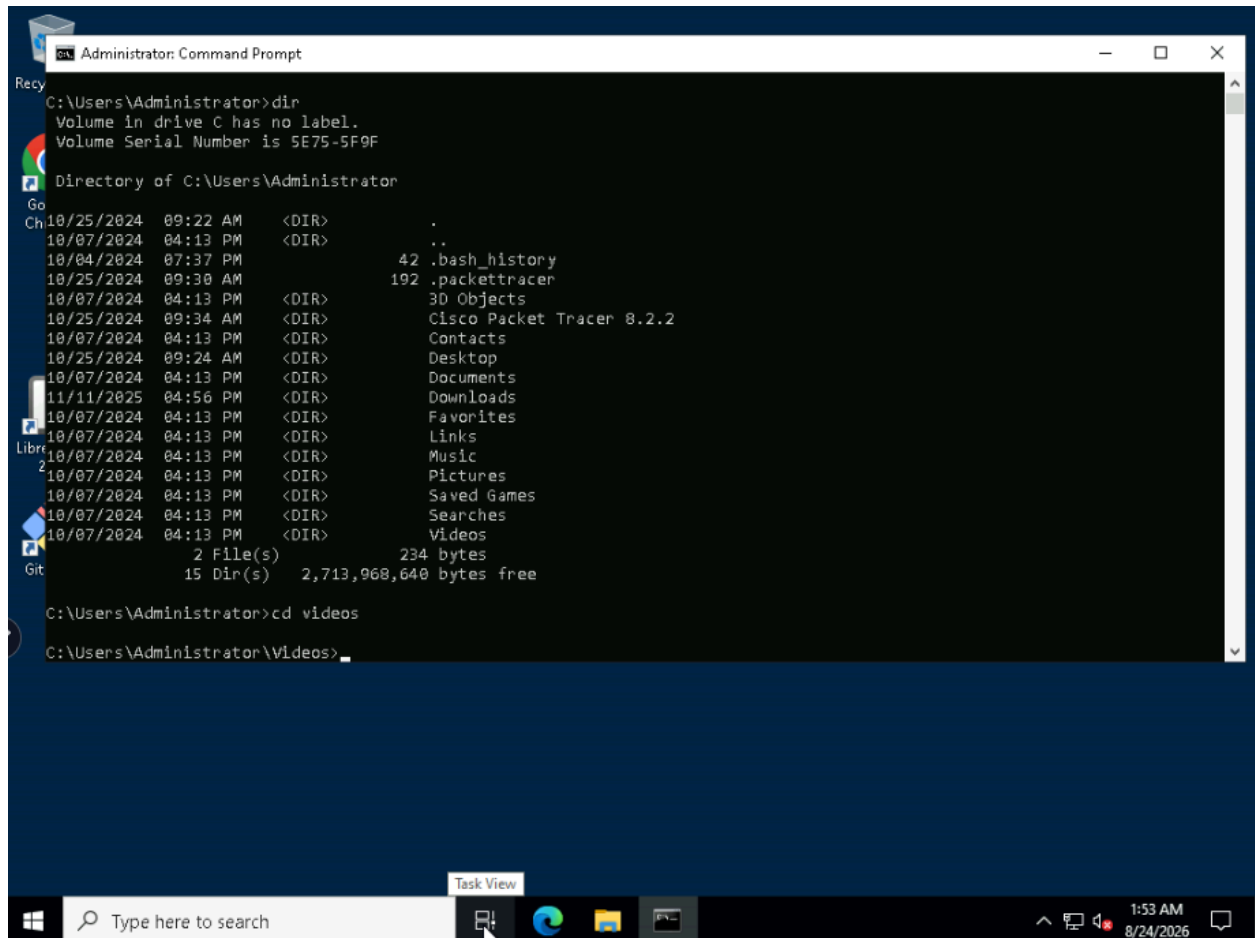

1.) Type “dir”

a.) Here you can see the contents of the current directory

- 2.) To change to the Videos directory type "cd videos"
 - a.) The command prompt has changed indicating that you are now in the C:/Users/Administrator/Videos

The screenshot shows a Windows 10 desktop with a taskbar at the bottom. The taskbar includes the Start button, a search bar with the text "Type here to search", and several application icons: File Explorer, Microsoft Edge, a yellow folder icon, and a terminal icon. The system tray on the right shows the date and time as "1:53 AM 8/24/2026".

The main window is titled "Administrator: Command Prompt". It displays the following text:

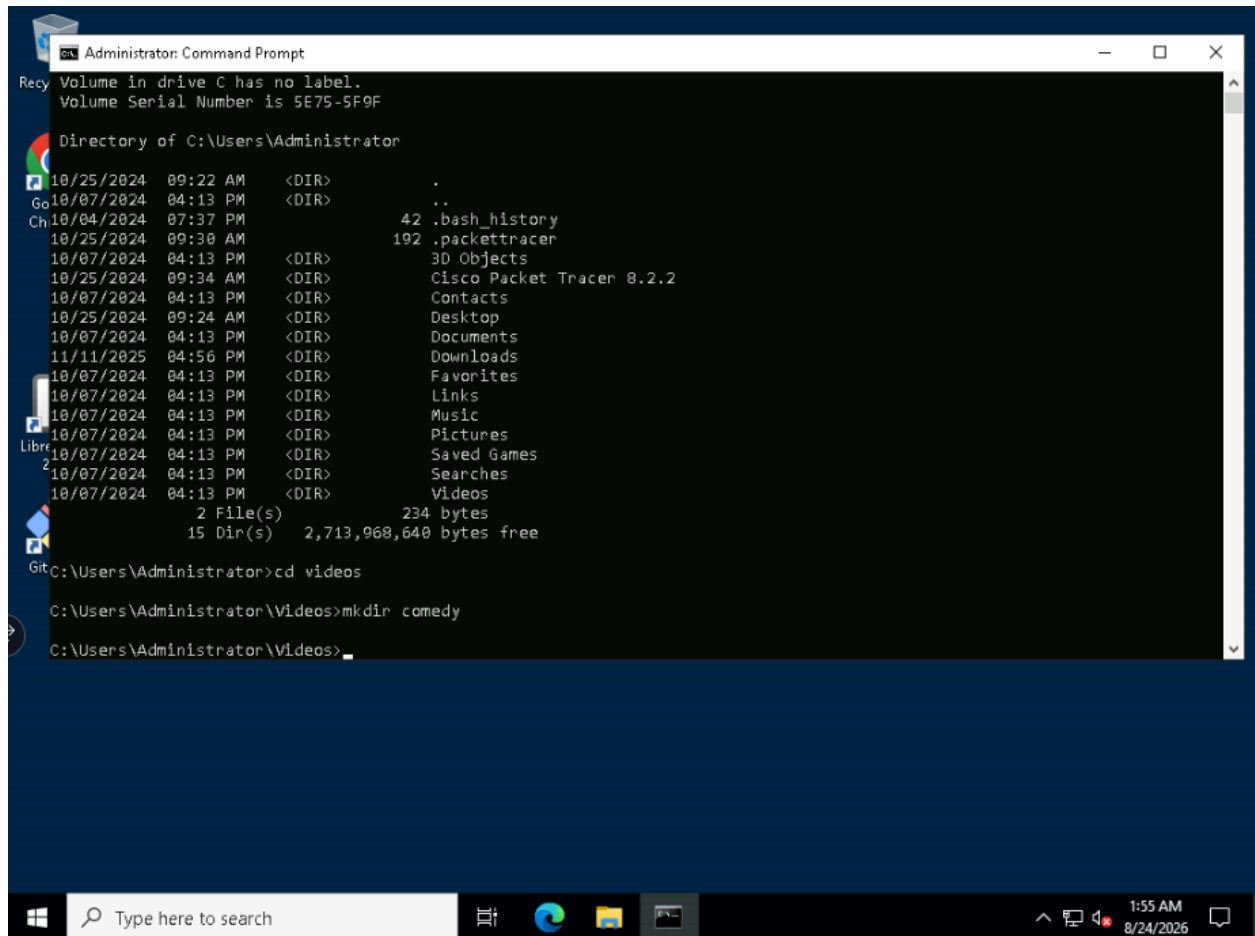

```

```

3.) To create a new directory, type “mkdir comedy”

4.) To view the newly created directory, type “dir”

The screenshot shows a Windows 10 desktop with a dark blue background. A taskbar at the bottom contains the Start button, a search bar with the text "Type here to search", and icons for File Explorer, Microsoft Edge, and Task View. The Task View button is highlighted. An "Administrator: Command Prompt" window is open, displaying a directory listing of the root of the C: drive. The listing shows standard Windows folders like Desktop, Documents, Downloads, Favorites, Links, Music, Pictures, Saved Games, Searches, and Videos. It also shows 2 files (234 bytes) and 15 directories (2,713,968,640 bytes free). The user then navigates to the Videos directory and creates a new directory named "comedy". A subsequent "dir" command shows the new "comedy" directory along with "." and "..". The free space in the Videos directory is now 3,986,612,224 bytes. The prompt is currently at "C:\Users\Administrator\Videos>".

6.) To verify that the directory has been removed, type “dir”

The screenshot shows a Windows 10 desktop with a taskbar at the bottom. The taskbar includes the Start button, a search bar with the text "Type here to search", and several pinned application icons: File Explorer, Microsoft Edge, a folder icon, and a terminal icon. The system tray on the right shows the date and time as "1:58 AM 8/24/2026".

The main focus is an "Administrator: Command Prompt" window. The command history is as follows:

```

7.) To return the to the previous directory, type “cd...”

The screenshot shows a Windows 10 desktop with a taskbar at the bottom. The taskbar includes the Start button, a search bar with the text "Type here to search", and several pinned application icons: File Explorer, Microsoft Edge, the Task View icon, and the Command Prompt icon. The system tray on the right shows the date and time as "1:59 AM 8/24/2026".

The Command Prompt window is titled "Administrator: Command Prompt". The command history is as follows:

Exercise 3: Perform system maintenance using the command line. Check the file system for errors and shut down the local system using the command line.

1.) Type “chkdsk”

- a.) This process will take several minutes as chkdsk checks the file system for logical and physical errors

```
